CloudCare Agent version: 4.16.214 – No Change

Cloud Backup Client version: 7.4.1 – No Change

Antivirus Client version: 19.6 – No change

Console version: 4.12.0

Release Summary

This release focuses on resolving numerous bug fixes within the console and services.

Resolved Issues

[CC-7641]	Fixed some variable typos with the alert emails that are sent in German
[CC-7725]	Fixed an issue with the upgrade URL (CCUpgrade.exe) on DE instance of CloudCare. (This fix went out as part of a hotfix during 4.11 version)
[CC-7738]	CloudCare console will no longer crash after making changes to an alert
[CC-7709]	Fixed an issue with auto renew toggle text alignment in the Services section within the Safari browser
[CC-7704]	Fixed an issue with additional service > subscription fields showing under a Device when a service has been offered but not installed. An example would be that Next Subscription Date, Expiration Date and Client Version fields will only show when the service has been installed to the device
[CC-7722]	Fixed an issue with Add Device - email invitation not being sent to the email address entered
[CC-5710]	Fixed an issue with status changes in the UI that were not being reflected in the pages
[CC-7772]	Fixed an issue with the customer list not loading and timing out
[CC-7625]	Fixed an issue with white/blacklists under custom categories not being deleted when the policy in Secure Web Gateway portal has been deleted
