Release Notes: Avast Business Antivirus 20.2 (April 22, 2020)

Windows Antivirus: 20.2

Release Summary

This release contains new improvements and bug fixes to our Avast Business Antivirus client.

Avast Business Antivirus 20.2 will be available for new installations straight away. All existing devices with Avast Business Antivirus 20.1 or lower will start the automatic upgrade to 20.2 at a later time.

If you wish to upgrade your devices to 20.2 prior to the automatic upgrade, then you can create a new Task (Update device – Program update task) from your console.

A system reboot will be required to complete the installation. There will be no forced reboot unless you have set this in your device policy settings. Servers will never reboot regardless of your device policy settings.

Improvements

- Improved Firewall - We've added more fire to the wall for better stability
- Bug fixes - We've stomped a few pesky bugs to keep things running smoothly
- Coronavirus scam protection - Avast continues to protect you against phishing scams, including ever-increasing COVID-19 scams and malware
- New statistics - Check out your security stats by clicking My statistics in the top-right menu
